FOR IMMEDIATE RELEASE

Explaining the Unexplained
A Real Solution for Overcoming the Obstacles in Life

DALLAS, Texas (November 2, 2011) – “Changing your appearance, one thought at a time' is more than a slogan; it is an established fact,” says The Image Enhancer and CEO of Beyond Style, LLC. The company is scheduled to release their new audio book, *Beyond Style The Quest*, the week of December 28, 2011. People all over the world can begin the New Year enlightened and encouraged that there is a real solution for overcoming obstacles on the pathway of life.

Beyond Style The Quest has uniquely combined the established facts of mental science with their signature brand of personal growth and development. The distinguishing quality of the audio book is The Image Enhancer's concentrated focus on the dual role of the mind. She believes that the average person has not awakened to the reality that thoughts have substance and are the creators of conditions, circumstances, and appearances of all sorts. She believes that most people are not conscious of what influences their thoughts. She uses her imagination resourcefully to make it easy for anyone to grasp the importance of every session. The Image Enhancer believes that only an efficiently developed mind can overcome the obstacles of life and remain balanced. *Beyond Style The Quest* is rooted in the belief that every condition, mentally or physically, has its origin in thought.

“I believe it is the desire of everyone to live an all-around-successful life, but this is almost impossible without the individual having a clear understanding of the relation thoughts have to everything, and everything means everything. Therefore, we must do better and go beyond blanket-statements that suggest individuals think positively alone – unexplained suggestions produce short-term results and confused thought. Explaining the unexplained is the only real solution for overcoming the obstacles of life,” says The Image Enhancer.

She believes that right-now, more than ever before, this awareness of the mind is what people all over the world need. Her belief is that society places too much emphasis on external appearances, and that the focus should be on what created the appearance. The Image Enhancer's idea to write a book turned into her personal quest, and that quest evolved into a definitive guide for helping individuals change their lives by changing their thoughts, which is now her contribution to humankind.

Beyond Style, LLC is headquartered in Dallas, Texas. The Image Enhancer has over 22 years of hands-on experience in fashion design and consulting. Her vast array of knowledge and her positive mental attitude gives her the unique ability to properly assist clients. The company believes that *Beyond Style The Quest* is the necessary change that will empower individuals to change their lives and communities worldwide.
